

ServcoCanada

Services Overview

ServcoCanada

Mechanical, Piping, Insulation & Structural

Services

At ServcoCanada, we offer a wide array of industrial mechanical, piping, insulation & structural services. Should your construction project be greenfield or brownfield, ServcoCanada can assist with all your requirements, providing the best value at a competitive price.

ServcoCanada can fulfill your Mechanical needs including piping, millwrighting (tanks, pumps, cranes, and crane rails, as well as rotating, and material conveyance equipment), and boilermaker (tanks & vessels) needs.

Electrical & Instrumentation

Services

Servicing the industrial and commercial electrical industries, ServcoCanada offers full-service electrical contracting from high voltage installations, low voltage, and network infrastructure.

Our knowledgeable field staff safely and efficiently execute any scope of work, from major industrial projects, to ongoing preventative facility maintenance, keeping your operations running smoothly. Working with our industry supply chain partners, we offer top-of-the-line electrical components at highly competitive pricing.

ServcoCanada's electrical division offers the following services:

- Industrial heat trace, system design, and installation
- IT network infrastructure, installation, and maintenance
- Lighting design and technology upgrades
- Fire alarm systems
- Power distribution (low, medium and high voltage)
- Industrial process control
- Standalone generator power system including design and installation
- Industrial commissioning and start-up
- Electrical inspections and industrial maintenance
- Troubleshooting and emergency service work
- Electrical project management

Industrial Facility Maintenance & Shutdowns

Services

ServcoCanada provides a one-stop-shop for the complete delivery of construction and maintenance projects; this reduces the reliance and cost of management contractors who have historically overseen the work undertaken by multiple subcontractors.

ServcoCanada has created an opportunity for single-point accountability in the supply chain.

Our ultimate goal is to increase cost certainty and control and add value for clients.

Engineering & Design

Services

Offering Engineering & Design, we effectively plan and execute projects, assuming full responsibility for tendering, planning, safety, building, quality, cost analysis, and management.

We review final drawings to create an achievable schedule and budget with a sound and realistic approach to projects.

Our team's established relationships with subcontractors, suppliers, and partners ensure competitive pricing and efficient project execution. We continually communicate and engage stakeholders throughout the project's various stages.

Site General Services

Services

ServcoCanada is a highly experienced provider of site wide services on projects of all sizes.

Our site general services include:

- ✓ Establishment of temporary facilities
 - Ground & services preparation
 - Offload, placement, hookup & commissioning (plumbing, electrical & carpentry)
 - Service supply (power, water and sanitation)
- ✓ Maintenance and servicing of temporary facilities
 - Generator refueling
 - Janitorial, recycling and sanitation services
 - Plumbing, electrical and carpentry
- ✓ Road maintenance
 - New roads
 - Snow management & removal
 - Road grading
- ✓ Material management
- ✓ Environmental management & waste services
 - Onsite decontamination
 - Recycling and waste disposal

Our highly skilled teams maintain strict worksite health and safety protocols before and during every project.

Project Management

Services

We provide a one-stop shop for the complete delivery of construction and maintenance projects; this reduces the reliance and cost of management contractors who have historically overseen the work undertaken by multiple subcontractors.

ServcoCanada has not only established an opportunity to reduce the cost of capital projects and operations, but we have also created an opportunity for single-point accountability in the supply chain.

We believe that the management of projects is improved through linear collaboration and aligned problem-solving. Collaboration offers an opportunity to work together with our clients, delivering solutions without compromise to safety, process, or execution quality.

ServcoCanada's business model reduces the overall cost to the client, increases the quality of delivery through collaborative working, and focuses on providing the right solution from the outset.

We can deliver efficiencies in contract management for clients by providing in-house service with skills ranging from senior process engineers, millwrights, electricians, and machine operators to traffic flaggers and labourers.

Civil Construction

Services

At ServcoCanada, we tailor our civil construction solution to suit your specific needs. With industry-forward techniques and materials, we provide beginning to end commercial and industrial application services. ServcoCanada has a proven track record of meeting all site preparation schedules for clients. Whether a simple scope or a mass cut to fill, we prepare sites on time to ensure subsequent work begins as planned.

ServcoCanada can complete pre-fabricated buildings, as well as stick builds. We are well versed in building complex concrete structures, including foundations, piling, pump houses, and lift stations. We have completed the cleanup and containment of hydrocarbon spills, including removing creosote, and arsenic contaminants. Our experience extends to erosion and sediment control as well as land and surface reclamation.

Our mechanical division can efficiently complete plant removal, plant relocation, installations, maintenance, and repairs.

Scaffolding

Services

We specialize in scaffold installation for petrochemical, energy, pulp and paper, manufacturing and other construction industries. Our scaffold team is made up of highly skilled and trained managers and workers supplied by the National Construction Council, with years of combined experience. We can set up scaffolds of any complexity to make it easier and safer for your workers to get their jobs done.

Equipped with all the necessary training and experience, our teams can safely and efficiently complete scopes of any complexity, from capital projects, mod yards, turnarounds to maintenance. Servco Scaffolding has you covered from start to finish. Our full range of scaffolding is available at an affordable price, helping your projects remain on budget and on schedule.

Servco Scaffolding begins every project with our number one priority in mind: Safety. We believe that the management of projects is improved through linear collaboration and aligned problem-solving. Collaboration offers an opportunity to work together with our clients, delivering solutions without compromising safety, the process of work, or the quality of execution.

Fabrication & Installation

Services

Through the implementation of cutting-edge equipment and best practices technology, ServcoCanada's Fabrication Division provides value-added products of the highest quality, both on time and on budget. With the added advantage of in-house engineering and inspection divisions, ServcoCanada has the ability to decrease turnaround times, reduce cost, and enhance efficiency.

We have three fabrication shops across Central & Western Canada:

- » 35,000 sq foot shop in Winnipeg, MB that can house up to 16 welding crews/shift
- » 8,000 sq foot shop in Regina, SK that can house up to 5 welding crews/shift
- » 8,000 sq foot shop in Kitimat, BC that can house up to 8 welding crews/shift

Fabrication Capabilities

01 PIPE SPOOLS

03 TANKS & BINS

05 EQUIPMENT INSTALL

- » Stationary & Robotic

07 LIFTING STRUCTURES

- » Jib Cranes, Crane Rails, Runways

02 SKIDS & MODULAR UNITS

04 CUSTOM CONVEYANCE SYSTEMS

06 STRUCTURAL & MISC. STEEL

- » Platforms, Supports, Bridge Retrofitting

08 SPECIAL PROJECTS

- » Hydro Pontoons, Retrofitting Train Cars
